High-Efficiency Paint Blender „rotation mixer“

Ref. No.:	Description
rm500-00	rm 500 High-Efficiency Paint Blender „rotation mixer“

The modern Table Blender has been developed in association with renowned manufacturers of lacquers and ink.

The rm 500 Model features most modern technology, high safety conditions, ergonomical operation, shortest blending periods and low maintenance work.

The work area is closed by means of a swing door provided with a sight window. A gas pressure spring facilitates the door opening. A safety switch has been designed to prevent OPENING during operation.

Modern electronics in accordance with VDE, a digital time-limit switch 3 digit (0 – 5 min / or 0 – 15 min) placed in a stainless steel frontcover, an emergency cut-out and an external safety device comply with international safety standards.

With regard to the vibration technology provided for, newly designed elements guarantee the mixer running at ease, as well as long service and low maintenance work.

The samples are held in position by an infinitely variable clamping unit which is easy to operate and provided with a safety limit-stop at the top end.

The tin is moved in nearly all directions of travel by the so-called zero stroke excenter with 1.425 RPM and an axial movement of approx. 30 mm.

Technical Data:

Dimensions: H x W x D (750 x 450 x 400 mm)
 Clamping unit: H x W x D (280 x 250 x 250 mm)
 Infinitely variable for tins of 50 ml – 5 l.
 Weight: approx. 90 kg
 Powder coated RAL 3002
 Supply: 220 V, 50 Hz, - 0,55 kw,6.3 Amp. Tr.

Price incl. Digital timer.
